CodeX in India - Introduction & Context

10-City launch, Total of 10,000 respondents across 7 brands

City-wise Awareness (CodeX)

10,000 Survey
Respondents

Launched in
10 Indian cities

CodeX shows its strongest market presence in Bangalore, Hyderabad, and Mumbai, with comparatively limited penetration in Lucknow and Jaipur, highlighting clear priority markets for near-term growth investment.

Research Objectives

10-City launch, Total of 10,000 respondents across 7 brands

Brand Awareness

Cola-Coka leads brand awareness at 14.04%, followed by Bepsi (11.76%) and Gangster (10.43%). CodeX currently sits at 5.25%, 6th of 7 tracked brands, ahead of only the aggregated "Others" category. This positions CodeX as an emerging entrant still building category recognition, with a meaningful awareness gap to close against the three established leaders.

Competitor Benchmarking

Cola-Coka and Bepsi dominate consumer choice, leading on availability, brand reputation, and taste. Gangster performs competitively in select markets. CodeX trails across most purchase drivers, particularly effectiveness and taste, signaling that product perception, not just awareness, needs deliberate investment to close the gap with category leaders.

Adoption Drivers & Barriers

Cola-Coka and Bepsi lead adoption through strong reputation and taste, while CodeX lags on effectiveness and visibility. The primary barriers to CodeX trial are health concerns, limited availability, and low unaided familiarity, with CodeX disproportionately affected relative to competitors, pointing to accessibility and perception as the two highest-leverage areas for intervention.

Product Development Feedback

To strengthen adoption, CodeX should prioritize taste and effectiveness improvements, invest in reputation-building campaigns, and expand distribution availability. Addressing health concerns through reformulated variants, paired with awareness-driving activations, offers the clearest path to narrowing the gap with Cola-Coka and Bepsi.

Survey Methodology

10-City launch, Total of 10,000 respondents across 7 brands

City-wise Awareness (CodeX vs Competitors)

Survey Methodology

10-City launch, Total of 10,000 respondents across 7 brands

A total of 10,000 respondents participated in the survey, providing a large and diverse sample across age, gender, and city tiers. This robust base ensures statistically reliable insights and meaningful comparisons between CodeX and competitors.

The study was conducted across 10 major Indian cities, covering a total of 10,000 respondents. Data was collected through a structured online survey, ensuring broad representation across age groups, gender, income levels, and student vs. working professionals. The approach provides a reliable base for comparing brand awareness, drivers, and barriers across the market.

The survey covered 10,000 respondents across major Indian cities, with the highest representation from Bangalore, Hyderabad, and Mumbai. The sample skews young, with over half (50%) aged 19–30, while 15–18 and 31–45 make up most of the rest. In terms of gender, males (60%) outnumber females (35%), with 5% identifying as non-binary. Based on age segmentation, the base consists of a strong student population (~60%) alongside working professionals (~40%), providing balanced perspectives across lifestyle groups.

Awareness & Reach

COLA-COKA : 14.04%

Bepsi : 11.76%

Cola-Coka 14.04% · Bepsi 11.76% · Gangster 10.43% · Sky 9 5.74%
· Blue Bull 5.59% · CodeX 5.25% · Others 2.72%

Brand Awareness (Heard Before) by Brand

Brand Awareness Comparison

CodeX currently holds 5.25% brand awareness, ranking 6th of 7 tracked brands. This positions CodeX as an early-stage entrant still building basic category recognition, with more than 2.5x the awareness gap to close against the leading brand alone. Awareness is not evenly distributed geographically: CodeX's recognition peaks in Bangalore and Hyderabad, while Cola-Coka dominates in Mumbai and Delhi, and Bepsi leads in Kolkata. This suggests CodeX's current footprint is concentrated rather than national.

Consumption Frequency

Consumption Frequency Analysis

Most CodeX consumers engage with the brand 2–3 times a week (37%), indicating meaningful repeat usage among those already converted. A sizable group consumes rarely (21%), pointing to untapped potential for deepening loyalty among lighter users. Geographically, Cola-Coka's awareness is strongest in Mumbai and Delhi, Bepsi leads in Kolkata, and CodeX's own awareness peaks in Bangalore and Hyderabad, reinforcing these two cities as CodeX's natural stronghold markets.

Brand Awareness: Competitive Standing

Brand	Awareness (Yes %)
Cola-Coka	14.04%
Bepsi	11.76%
Gangster	10.43%
Sky 9	5.74%
Blue Bull	5.59%
CodeX	5.25%
Others	2.72%

CodeX trails the category leader by 8.8 points (14.04% vs. 5.25%), but sits within half a point of Sky 9 and Blue Bull. The nearer-term competitive target isn't Cola-Coka, it's overtaking the two brands CodeX is already running neck-and-neck with.

Perceptions & Market Position

Brand Perception (Positive/Neutral/Negative) by Brand

Brand Perception by Brand

CodeX's sentiment is concentrated in the Neutral band, with smaller, roughly balanced shares in Positive and Negative, a "wait and see" profile rather than a strongly favorable or unfavorable one. Category leaders show visibly larger Positive segments, indicating they've converted awareness into actual favorability. CodeX hasn't made that conversion yet for most people who know the brand, the opportunity here is turning Neutral into Positive, not fighting Negative sentiment.

General Perception by Brand

Across all brands, "Effective" and "Not sure" are the two largest response categories, with "Healthy" and "Dangerous" both trailing, consumers judge energy drinks primarily on functional performance, not health framing. For CodeX, the "Not sure" segment is comparable in size to its "Effective" segment, suggesting many respondents are genuinely undecided rather than actively distrustful. Undecided is a far more addressable barrier than distrust, it's a familiarity gap, not a reputation problem.

Taste Experience by Brand

Among respondents who've tried CodeX, ratings cluster in the 3–4 range, with a smaller share at the extremes than category leaders show. This points to a reasonably satisfying but not yet differentiated taste experience, consistent with taste being one of CodeX's stronger purchase drivers, but with real room to convert "good" into "excellent."

Purchase Decision Drivers – CodeX vs Competitors

Top reasons for choosing CodeX

Top Reasons for Choosing CodeX

CodeX's equity is anchored in brand reputation and taste, the two factors that most influence buyers who've already chosen the brand, with availability playing a supporting role, particularly in larger metro markets. This reinforces where CodeX should double down: reputation and taste are working, and the growth constraint lies elsewhere, as the barriers below make clear.

Key Factors Hindering CodeX Adoption

Key Factors Hindering CodeX Adoption

Trial is being held back by three factors: health concerns, limited local availability, and low interest in the category overall. Health concerns carry the most weight and, notably, they're strongest in Bangalore, Hyderabad, and Mumbai, the exact cities where CodeX's awareness is already highest. That overlap matters: simply pushing more people to hear about CodeX in these markets won't convert them if the underlying health hesitation isn't addressed first.

Purchase Decision Drivers – CodeX vs Competitors

Bepsi		CodeX	
Healthier alternatives	300	Healthier alternatives	143
More natural ingredients	520	More natural ingredients	234
Reduced sugar content	629	Reduced sugar content	298
Wider range of flavors	453	Wider range of flavors	208
Cola-Coka		Gangster	
Healthier alternatives	394	Healthier alternatives	274
More natural ingredients	645	More natural ingredients	471
Reduced sugar content	742	Reduced sugar content	563
Wider range of flavors	500	Wider range of flavors	355

Feedback from consumers

The strongest cross-brand signal is a consumer shift toward health-conscious choices: reduced sugar, natural ingredients, and healthier alternatives are valued across every brand studied, most strongly for Cola-Coka and Bepsi. For CodeX, aligning product development with this trend, rather than competing on flavor variety alone, offers the most direct path to closing the gap with category leaders.

Key Insights

- Consumers across all brands demand less sugar and more natural ingredients, strongest with Cola-Coka & Bepsi.
- Healthier alternatives (low-calorie/sugar-free) are a rising priority, showing a shift to health-conscious choices.
- Wider range of flavors is also valued, especially among younger consumers seeking variety.
- For CodeX, aligning with these trends (sugar-free, natural ingredients, flavor innovation) offers the fastest path to compete with market leaders.

Segmentation Insights

Age Distribution

Age Distribution

CodeX's current user base concentrates among 19–30 year-olds (55.2%), with 31–45 year-olds forming a smaller secondary segment (23.8%). Teenagers (15–18) account for 14.9%, while users 46+ remain minimal (4.3%) combined. The core audience today is young adults, professional-age consumers and teens are both comparatively untapped.

Gender Distribution

Gender Distribution

CodeX's base skews male (60.4%), with female users at 34.6% and non-binary users at 5.1%. This is more male-skewed than the survey's overall respondent pool, indicating CodeX under-indexes with female consumers specifically, a concrete expansion target rather than a general diversity goal.

City Tier Distribution

City Tier Segmentation

Three-quarters of CodeX's current users (75.4%) are in Tier 1 cities, with Tier 2 accounting for the rest (24.6%). Given Tier 2's lower distribution costs and less saturated competition, this concentration suggests CodeX's Tier 1 growth ceiling may be approaching faster than its Tier 2 opportunity has been tapped.

Key Takeaways

Strengths

- High taste preference
- Strong brand reputation

Weaknesses

- Limited availability
- Price sensitivity

Opportunities

- Expansion in gyms
- Sugar-free variant
- Youth-oriented branding

Threats

- Established competitors with more than double CodeX's brand awareness (Cola-Coka 14.04% and Bepsi 11.76% vs. CodeX 5.25%)

Recommended Marketing Actions

Increase brand visibility

- Targeted ads
- Social media campaigns
- Campus outreach

Expand distribution

- Partner with gyms, e-commerce, kirana stores

Product development

- Introduce affordable & sugar-free variants

Differentiation

- Build a distinct brand narrative around performance and health-forward formulation

Conclusion

- 01** CodeX is building a foothold in India but needs availability + affordability focus to grow market share.
- 02** Survey results provide a data-backed roadmap for marketing & product teams.

Detailed Survey Questions

Provide Insights to the Marketing Team in Food & Beverage Industry
(Survey Questions and Response Options)

• **Demographics:**

1. What is your age group?
a) 15-18
b) 19-30
c) 31-45
d) 46-65
e) 66+

2. What is your gender?
a) Male
b) Female
c) Non-binary

3. Which city in India do you reside in?
a) Delhi
b) Mumbai
c) Bangalore
d) Chennai
e) Kolkata
f) Hyderabad
g) Ahmedabad
h) Pune
i) Jaipur
j) Lucknow

• **Consumption Habits:**

1. How often do you consume energy drinks?
a) Daily
b) 2-3 times a week
c) Once a week
d) 2-3 times a month
e) Rarely

Demographics

2. When do you typically consume energy drinks?
a) Before exercise
b) To stay awake during work/study
c) For mental alertness
d) Throughout the day

3. What are the main reasons for consuming energy drinks?
a) Increased energy and focus
b) To combat fatigue
c) To boost performance
d) To enhance sports performance
e) Other

• **Awareness and Perception:**

1. Have you heard of our energy drink before today?
a) Yes
b) No

2. What do you think of the brand name/logo/design?
a) Positive
b) Neutral
c) Negative

3. What is your perception of energy drinks in general?
a) Healthy
b) Effective
c) Dangerous
d) Not sure

• **Product Experience:**

1. Have you ever tried our energy drink before?
a) Yes
b) No

Awareness and Perception

2. If yes, how would you rate the taste, flavor, and overall experience?
a) 1 (Poor)
b) 2 (Below Average)
c) 3 (Average)
d) 4 (Good)
e) 5 (Excellent)

3. If no, what are the main reasons preventing you from trying it?
a) Not available locally
b) Not interested in energy drinks
c) Unfamiliar with the brand
d) Health concerns
e) Other

• **Competitor Experience:**

1. Which energy drink brands do you currently consume or prefer?
a) Coca-Cola
b) Pepsi
c) Sprite
d) Fanta
e) Others

2. What are the reasons for choosing those brands over others?
a) Brand reputation
b) Taste/Flavor preference
c) Effectiveness
d) Availability
e) Other

3. What improvements would you like to see in energy drinks currently available in the market?
a) Reduced sugar content
b) More natural ingredients
c) Wider range of flavors
d) Healthier alternatives
e) Other

Competitor Experience

• **Ingredients and Health:**

1. What ingredients do you expect in an energy drink?
a) Caffeine
b) Vitamins
c) Sugar
d) Guarana

2. Are you concerned about the health impacts of energy drinks?
a) Yes
b) No

3. Would you be interested in an energy drink with natural or organic ingredients?
a) Yes
b) No
c) Not sure

• **Marketing and Packaging:**

1. Which marketing channels or platforms do you often come across energy drink advertisements?
a) TV commercials
b) Online ads
c) Print media
d) Outdoor billboards
e) Other

2. What type of packaging or bottle design would attract you to purchase an energy drink?
a) Compact and portable cans
b) Innovative bottle design
c) Eco-friendly design
d) Collectible packaging
e) Other

3. Would you be more likely to buy an energy drink with limited edition packaging?
a) Yes
b) No
c) Not sure

Ingredient and Health/ Marketing and Packaging

• **Pricing and Availability:**

1. What price range do you consider reasonable for an energy drink?
a) Below 50
b) 50-99
c) 100-150
d) Above 150

2. Where do you typically purchase energy drinks?
a) Local stores
b) Supermarkets
c) Online retailers
d) Gyms and fitness centers
e) Other

3. In which situations or activities do you typically consume energy drinks?
a) Sports/exercise
b) Studying/working late
c) Social outings/parties
d) Driving/commuting
e) Other
